

WHAT IS THE CPM 4500?

An efficient crab-cutting machine!

A high speed cost effective crab processing machine that is safe and easy to use.

Process multiple sizes and species

Designed to be versatile and adaptable to different sizes and species of crab, the CPM 4500 can handle it all. Maximize your efficiency with a versatile machine that can process anything from small blue crabs to large king crabs and process up to 4500 lb of crab per hour.

Low-cost labour

The advanced technology and precision of the CPM 4500 have the potential to replace up to three conventional manual crab butchers. Let our machine help you streamline your operations and reduce labour costs with consistent processing rates.

Lightning speed process

Take your crab processing operations to a whole new level. With the CPM 4500, you can count on reliable processing rate any day of the week. Designed to maximize efficiency, this machine allows you to process large quantities of crab quickly and easily.
